

KI Email Template for Students

Subject: Go beyond the arts and sciences with Knowledge Integration

If you're looking for a unique university experience abroad that provides the flexibility to combine your interests while gaining the skills you'll need for a fulfilling career in almost any industry, consider [Knowledge Integration \(KI\)](#) at the University of Waterloo in Canada. **Applications for the Fall 2025 have been extended to May 15!**

In KI's [core courses](#), you'll develop important skills such as critical thinking, effective communication, problem solving, and collaborating in teams. You'll develop these skills while specializing in any topic you find interesting such as biology, philosophy, computer science, business, psychology, or climate change, to name a few.

KI's tight-knit community provides a supportive environment where you'll learn how to integrate knowledge from different disciplines to solve complex problems. You'll also have opportunities to apply your knowledge through hands-on work, such as KI's 8-month collaborative design experience and an independent project of your choosing.

KI attracts students who are curious, creative, and looking for the flexibility to study their many interests. Want to learn more? Reach out to Solène Jollivet, KI Outreach and Administrative Manager (and a graduate of KI!), either by sending her an [email](#) or booking [an info meeting](#).
